Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAIL ACTION

Notice to Applicant(s)

1. This application has been examined. The preliminary amendment filed on December 29, 2004 has been entered. Claim 1 has been deleted. Claim 2 has been added. Thus, claim 2 is pending.
2. The prior art submitted on December 29, 2004 has been considered.
3. Receipt is acknowledged of papers submitted under 35 U.S.C. § 119, which have been placed of record in the file.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in paragraphs 012 and 013 (hereafter the "admitted art") in view of Wozniak (6,278,925).
7. The "admitted art" discloses a device for evaluating vehicle, driving and operating parameter which makes a selection of gear ratios available as shown in paragraphs 012 and 013. The "admitted art" does not take into consideration among the influence parameters any of the service life. However, Wozaniak suggests an adaptive method onset of positive torque in a powertrain having an automatic transmission which includes the teaching of the gear ratio of the axle and performance variations associated with the service life of the powertrain as shown in at least column 1, lines 27-30. It would have been obvious to an ordinary skill in the art at the time the invention was made to incorporate the teaching of Wozaniak into the system of the "admitted art" in order to take the service life of the powertrain into account in order to make a better selection of the gear ratio.

Conclusion

8. Claim 2 is rejected.
9. The following references are cited as being of general interest: Drexler (6,040,768), Chene (6,225,892), Genise et al. (6,526,816), and Depping et al. (6,819,987).
